

AMENDMENT TO THE SPECIFICATION

Please amend the specification as shown below:

Page 8, beginning at line 17:

The present invention in the form of a computer program for editorially icon marking an electronic writing consists of: a set **10** of editorial icons or icons (markings) for insertion into the writing, a means for selecting **12** a specific marking **14** for insertion into the writing, a means for saving **16** the inserted markings, a means for compiling **18** summary statistics **20** for the saved markings, a means for filtering **22** the saved markings so that only a specified portion of such markings remain in the writing when its marked version is returned to its writer, and a means for hyperlinking **24** the inserted markings to specified websites that explain the markings and contain exercises that one can undertake in order to strengthen those writing skills which are denoted by the markings as representing areas needing improvement.
